

Annual International Scientific Session of Doctoral Students

THE CONTEMPORARY GEO-SPATIAL ANALYSIS FOR THE FUTURE SPATIAL PLANNING

Oradea, Romania, December 17, 2025

On site: 11:00 EET (GMT+2), Council Hall, University of Oradea

On line: 11.00 EET (GMT+2), <https://shorturl.at/8IH2q>

Geography is as much about better understanding the complexity of the contemporary world as it is about opening new horizons, not only in academia, but also in society. At the same time, Geography is also about bringing scientists together, to find and provide practical, realistic and long-term solutions that make the world safer and more sustainable, opening up many specific professional opportunities in geoinformatics and spatial analysis with a focus on tourism, territorial planning, heritage, environment, education, etc.

In this context, the University of Oradea, the Faculty of Geography, Tourism and Sport through the Doctoral School of Geography, Sports Science and Physiotherapy, in collaboration with 10 specialized doctoral schools of the: Abai Kazakh National Pedagogical University (Kazakhstan), Akdeniz University (Turkey), *Ilyas Zhansugurov Zhetysu* University (Kazakhstan), Kore University of Enna (Italy), *L.N. Gumilyov* Eurasian National University, Astana, (Kazakhstan), *Stefan cel Mare* University of Suceava (Romania), University of Antilles (Guadeloupe & Martinique, France), University of Debrecen (Hungary), University of Gdansk (Poland), *V.N. Karazin* Kharkiv National University (Ukraine), organizes on December 17, 2025, between 11.00-16.00 (*Eastern European Time (Romania): EET is GMT/UTC + 2h*) the scientific communications session of doctoral students. The scientific committee is made up of doctoral supervisors' professors from the participating universities. The event will take place in a hybrid system, online and on-site, with a focus on promoting interdisciplinary research. The activity focused on the 21 presentations of the research results will be preceded on December 15-16, 2025, by workshops and practical field activities of the doctoral students under the academic guidance of the doctoral supervisors.

In this regard, the University of Oradea and its academic partners thus provide doctoral students a fertile environment for the promotion of individual and team research results, an opportunity to find together appropriate solutions for a safer, greener and more sustainable future for complex problems specific to natural ecosystems and contemporary human society.

The event with participation in a hybrid system is also open to the interested public through live access on the Teams platform ([Link](#)) where they can interact with the participants and implicitly have their own contributions to the topic of the event.
